McLane Advanced Technologies announces promotion – Chris Zendt, Senior Vice President for Operations

Temple, TX – McLane Advanced Technologies (MAT), a leading provider of software solutions, IT Services, and support, has announced the promotion of Chris Zendt to the position of Senior Vice President for Operations. In this expanded role, Chris will oversee the overall operations of the military and government business units with focus on driving operational excellence.

“Chris has played an instrumental role in the growth of the company over the last several years,” said Chuck Costanza, CEO of MAT. “His leadership and ability to execute can be attributed to his dedication and tireless work ethic. There’s no doubt Chris will continue to drive the business and this promotion is well deserved.”

Chris started with MAT in July of 2004 as an Integration Manager. During that time, he developed and provided management oversight for software testing, training, documentation as well as the sustaining strategy for MAT’s SAMS-E Project, which is the logistical software MAT developed for the U.S. Army. Under his guidance, SAMS-E has been continuously developed and is in use by the US Army worldwide.

Chris served in the U.S. Army for more than 20 years after graduating from the Virginia Military Institute and retired as Lieutenant Colonel. He has over 25 years of automation, logistical, and training experience and is a veteran of Operations Desert Storm and Enduring Freedom.
