McLane Advanced Technologies holds Executive Forum at Minute Maid Park

Temple, TX – McLane Advanced Technologies (MAT) held an Executive Forum on April 7 at Minute Maid Park in Houston to discuss IT virtualization with CEOs from a variety of industries. The forum kicked off with a brief review on how companies can improve reliability and save money through a virtualized IT infrastructure. The Houston Astros' Director of Information Technology Steve Reese also talked about the IT work MAT had performed for the Astros organization and the improved performance they have seen in their IT network. After some in-depth discussion, the group moved on to a behind-the-scenes tour of Minute Maid Park that ended up in the Houston Astros Owner's suite to enjoy an afternoon baseball game.

The forum gave CEOs a chance to really look at their current IT infrastructure and learn how to use virtualization to benefit their company. "By getting them out of their normal environment, they had a chance to ask questions and really think about their current technology setup," said Skip Carruth, vice-president of commercial services for MAT. "It also gave them a chance to get out of the office and enjoy a baseball game with a collection of their peers."

During the game, Drayton McLane, owner of the Houston Astros, came by to meet and greet the group and take pictures. Overall, the event was well received and MAT is currently planning the next forum. For a complete schedule of upcoming events, visit www.mclaneat.com.
