McLane Advanced Technologies Promotes Three

Temple, TX – McLane Advanced Technologies (MAT), a Temple based Information Technology and Logistics Company, has announced promotions for three leaders. Drayton McLane III, Todd Erskine and Tim Moul have all been promoted and/or assuming new responsibilities in 2008.

Drayton McLane III has accepted the position of Director of Purchasing and will begin those responsibilities immediately. Due to recent explosive growth of MAT, a Purchasing Director was needed to consolidate and focus on making purchasing decisions for the organization, employees and customers. Drayton came to MAT after working in a variety of positions at the parent company McLane Group. Chuck Costanza, CEO of MAT commented, "With the addition of Drayton to our Staff, MAT will have a new function and a new capability. As the Director of Purchasing, Drayton will be responsible for coordinating our spending with multiple vendors. He will be doing this, not only for MAT, but for other Business Units within McLane Group. By leveraging the spending for multiple businesses, we believe we will be able not only to better control our costs, but also get better pricing, payment terms, and service from our vendors. Please join me in welcoming Drayton to MAT."

Todd Erskine has accepted the position of Senior Director of Operations effective immediately. "Todd has been instrumental in not only our explosive growth but in establishing our reputation of quality at a fair price," said Bob Reeves, COO and President of MAT. He will continue to not only lead the fielding and training efforts, but additional duties of building teams and business for the company within the Army, Army Reserves and the National Guard. Todd has served as the Director of Field Operations since joining MAT in 2005.

Tim Moul, Tim has been our testing manager since he joined the company in 2004. During that time his efforts directly have contributed to MAT being considered for the designation of Software Integration Lab for the US Army. As a result of the testing environment set up by Tim and in recognition of his performance Tim is being promoted to Test Director for MAT commencing immediately. Bob Reeves commented, "Tim's testing background with Army Test and Evaluation Command has greatly aided us in adding this to our core competencies."
