## **McLane Advanced Technologies Accepted as a Software Engineering Institute (SEI) Partner to Provide CMMI Services**

**Temple, TX** – McLane Advanced Technologies, LLC (MAT) announced today that they have been accepted by the Software Engineering Institute (SEI) as an SEI Partner to provide Capability Maturity Model® Integration (CMMI) appraisal and training services.

CMMI Appraisal and Training Services consist of process improvement framework in principle areas such as management, engineering, and acquisition practices. CMMI is a process improvement approach that provides organizations with the essential elements of effective processes. It can be used to guide process improvement across a project, a division, or an entire organization. CMMI helps integrate traditionally separate organizational functions, sets process improvement goals and priorities, provides guidance for quality processes, and provides a point of reference for appraising current processes.

Cliff Luckey, VP of Technology for MAT, said, "CMMI has become part of MAT's culture. We continually seek ways to improve our capabilities in our quest to achieving excellence in software development and customer service. Technology is constantly changing and our customers require us to provide proven methodologies that ensure quality, reduce cost, and enhance their customer experience in this dynamic environment." He continues by saying, "The CMMI level III accreditation was an important step in our goal of achieving excellence. CMMI is becoming the standard model used to guide process improvement. CMMI helps MAT integrate traditionally separate organizational functions, set process improvement goals and priorities, provide guidance for quality processes, and provide a point of reference for appraising current processes."

MAT is a software development company located in Temple, Texas. The company provides value-added business solutions to government and commercial businesses as well as dedication to provide on-time, on-budget, logistics and information technology (IT) services.
