MAT Welcomes CW4(Ret) Bill Berriman as the National Guard Field Service Representative

New McLane Advanced Technologies' teammate, CW4(Ret) Bill Berriman brings with him over 34 years combined experience with the United States Navy, the United States Army, and the Army National Guard. His level of experience in Military Maintenance Systems is immeasurable and we welcome him to the team.

TEMPLE, TEXAS.

Hailing from Red Oak, Iowa and serving over 34 years in our department of defense, Retired Warrant Officer William (Bill) Berriman joined McLane Advanced Technologies, LLC (MAT) on March 3, 2008. Although stationed in Iowa, Bill will be working with the MAT National Guard Fielding Team out of Camp Robinson, AR and other fielding sites at various Reserve, National Guard and Active Duty locations. The purpose of these teams is to integrate the Standard Army Maintenance System – Enhanced (SAMS-E) into all the Army National Guard units. This software replaces the outdated legacy maintenance systems of SAMS-1, SAMS-2, and ULLS-G.

Bill Berriman will serve as the Lead National Guard Field Service Representative and Mobile Training Team (MTT) Service Lead. He will be available to assist deploying units and those returning from deployments. He will also be available to assist with National Maintenance Programs, Reset, and support any National Guard STAMIS assistance needs as requested. Bill has successfully completed a variety of job assignments in the National Guard including: Configuration Specialist (NMTC), Computer Operator (CTASC), Logistics Management Specialist (CSSAMO), and an Equipment Specialist. His ability to then translate that experience into fielding the replacement software SAMS-E will save the National Guard time and money.

Bill is married to Theresa Berriman and resides in Mingo, Iowa. Please join us in welcoming Bill to the McLane Advanced Technologies Team.

MAT is a services-based, technology company offering a unique blend of military experience, corporate knowledge, and unprecedented commitment to the customer to ensure that each project is completed on time and on budget. For more information on MAT, please visit our website at: www.mclaneat.com or call 254-770-6165.
