## **McLane Advanced Technologies Awarded Contractor Field Technician Support Contract for the Standard Army Maintenance System-Enhanced**

**MAT has been awarded a contract with the U.S. Army Project Manager for Logistics Information Systems (PM LIS) to provide Contractor Field Technicians (CFT) to Army units deployed to Afghanistan, Iraq, and Kuwait.**

Temple, TX

As a subcontractor to Computer Sciences Corporation (CSC), McLane Advanced Technologies, LLC (MAT) was awarded a contract with the U.S. Army Project Manager for Logistics Information Systems (PM LIS) to provide Contractor Field Technicians (CFT) to Army units deployed to overseas locations such as Afghanistan, Iraq, and Kuwait.

PM LIS awarded CSC a three-year, \$46.2 million prime contract under the Army's Information Technology Enterprise Solutions-2 Services (ITES-2S) program. MAT's share of the award for SAMS-E support is estimated at nearly \$13.3 million.

Over the last four years, MAT has modernized three legacy maintenance software systems for the U.S. Army and fielded the Standard Army Maintenance System-Enhanced (SAMS-E) worldwide. MAT has fielded over 14,000 systems, providing integration and training support to soldiers at all levels of Army maintenance. SAMS-E provides unit commanders and maintenance personnel with an easy to use, automated maintenance system that supports unit level maintenance activities, shop production, and maintenance managers at all levels.

MAT's Contractor Field Technicians will provide remote and on-site SAMS-E support to deployed Army units in Southwest Asia. "Our CFTs will enable, train, and support the warfighter—ensuring that SAMS-E works to its full potential where it is most critical," said Robert Reeves, President, McLane Advanced Technologies, LLC.

McLane Advanced Technologies, LLC provides both government and commercial information technology and logistics services. MAT serves U.S. military, government, and commercial customers throughout the world.
